

Optimyst Suite

FREESTANDING ELECTRIC SUITE

RTOPCS20

This complete Optimyst electric suite acts as a dramatic focal point for any space and incorporating Innovative Optimyst technology, the suite displays the most realistic flame and smoke effects available.

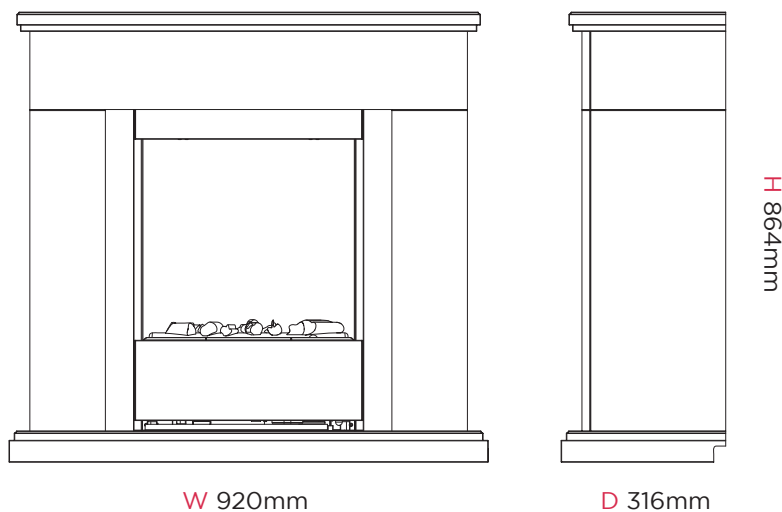

It's fully adaptable, so you can get the ideal mix of real heat from a concealed fan heater while tuning in the perfect mix of smoke and flame effect. With a removable brick effect back panel, the suite is the full package.

The fire can be operated via a remote control and can even be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round. The thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home.

The design is simple yet elegant, blending in perfectly with any interior design. The Dimplex Optimyst range is state-of-the-art, using established ultrasonic technology to create an ultra-fine water mist that rises up and works with the under fuel bed lighting to give a fully three dimensional fire effect. The result is so authentic that it is regularly mistaken for true flames and smoke.

Optimyst Suite
