

PSW100

The PSW100 is a free standing 100L buffer that stores energy for the defrost cycle and reduces compressor cycling. It has factory fitted polyurethane insulation for minimal heat loss. The inner vessel is mild steel container so must therefore be used with inhibitor.

Technical data

Rated capacity	100L
Height	850mm
Diameter	512mm
Weight	45kg
Connections:	
Immersion heater inserts	2 x 1 1/2" FPT
Air vent	1" to 1/2" FPT
Heating water flow	1" FPT
Heating water return	1" FPT
Max. permissible operating temperature, heating water	95 C
Max. permissible working pressure, heating water	3 Bar
