

Inline Axial Fan

Airline AI100

4"/100mm Inline axial fan

Clearing excess steam in the bathroom is no longer a problem with the Xpelair Airline AI100 inline extractor fan and its perfectly optimised impeller design.

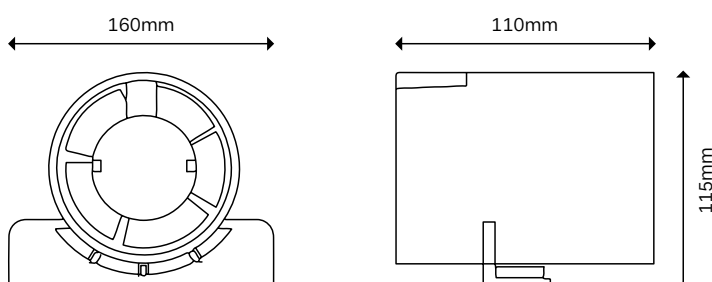

It gives high level performance and meets Building Regulations Part F - even when installed with ducting and an external grille. The AI100 has the additional benefit of being installed up and out of the splashzone in the loft, helping to keep noise levels to a minimum. The product comes complete with a loft fitting kit which includes flexible ducting and internal / external grilles, giving everything needed to complete the install.

AI100 is a standard fan. This means that it is activated by an external switch (for example a lighting circuit) and will stop once the external switch is turned off

Technical Details

	AI100
No speeds	1
Power (W)	16
Duct size (mm)	100
Flow rate (l/s)	24
Flow rate (m3/hr)	85
Noise dBA @ 3m	40
