

Inline Axial Fan

Airline All100T

4"/100mm Inline axial fan

Clearing excess steam in the bathroom is no longer a problem with the Xpelair Airline All100T inline extractor fan and its perfectly optimised impeller design.

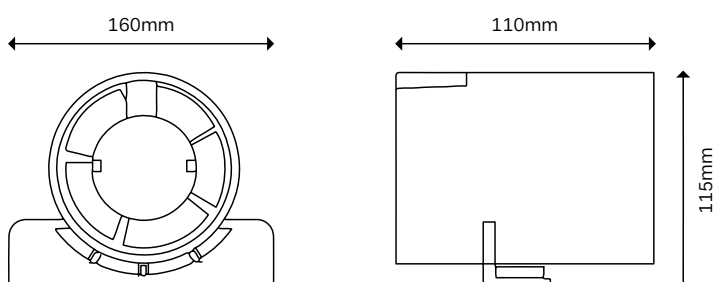

It gives high level performance and meets Building Regulations Part F - even when installed with ducting and an external grille. The All100T has the additional benefit of being installed up and out of the splashzone in the loft, helping to keep noise levels to a minimum. The product comes complete with a loft fitting kit which includes flexible ducting and internal / external grilles, giving everything needed to complete the install.

All100T includes a cool white LED light and comes complete with a SELV transformer. The fan has an overrun timer which can be set at install between 2 and 30 minutes. This means that the fan continues to operate for this time once the external switch (for example a lighting circuit) is turned off.

Technical Details

	All100T
No speeds	1
Power (W)	19
Duct size (mm)	100
Flow rate (l/s)	24
Flow rate (m3/hr)	85
