

# DX150S

**6" / 150mm axial extract fan**

The DX150S intermittent extract fan is designed for those looking for something conventional, with a modern twist. The fan controls humidity, odours and mould growth effectively in kitchens, utility rooms, larger bathrooms and individual offices.

Suitable for both wall and ceiling fitting, the DX150 range has 2 speeds, selectable at install, and comes complete with backdraught shutters. DX150S is a standard fan. This means that the fan is activated by an external switch (for example a lighting circuit) and will stop once the external switch is turned off.

## Technical Details

	<b>DX150S</b>
<b>No speeds</b>	2
