

## Architectural Air Curtains

### Models for 3m, Vertical & 4m installation

Designed for the most prestigious of entrances where appearances are as important as functional performance.

The Dimplex ARC architectural air curtains are the perfect blend of efficient performance and modern aesthetics to blend in with surroundings or as a feature.

- Stainless Steel or RAL colour coded finishes
- Horizontal or Vertical Installations
- Electric, LPHW or Ambient options
- Models suited to low temperature heat sources including 60/40°C, 55/45°C & 45/35°C flow temperatures
- Electronic control system with auto functionality

## Saves energy every day

The Dimplex range can be used to accentuate the design elements of the building, or complement a theme that runs through the space in which the air curtain will be situated.

Heavy duty construction and a wide choice of desirable finishes for the perfect balance of form and function.

Wider entrances with multiple doors can be catered for with a designer look across the full width of the doors.

Vertical air curtains beside the entrance are often used as a design feature for the entrance.

Wide range of colours available

Electronic control systems are fitted as standard to every model making auto operation an easy consideration, as is the integration to building control systems helping building energy consumption as a whole.
