

COUNTERTOP

URN

Dimensions

Product Introduction

The Sensaboil countertop is a freestanding auto fill and boil unit, ideal for beverage making and food preparation where wall mounting over a sink is not available.

Redding's manual fill and boil portable catering Urn offers great flexibility for temporary indoor and outdoor event requirements.

Key Features

- Convenient boiling water readily available at point of use, no and waiting for kettles to boil
- Available in 5 litre countertop and 10 litre capacity Urn models to suit a wide range of applications
- 304 catering grade stainless steel for consistent tasting beverages
- 3kW heating element for rapid response re-heating with thermal cut-out safety protection
- Simple tap operation, push and hold to control flow or pull and lock for a continuous dispense
- SENSABOIL COUNTERTOP is an auto-fill and boil unit with on/off touch control panel, neon indication status and descale now notification. It is supplied with ¾" BSP inlet connector/adaptor and 2 metres of blue cold water supply hose
- REDRING URN is a manual fill and boil unit with thermostatic control, boil dry cut-out and 1.7 metres of cable with fitted UK plug
