

Electrical Connections

The electrical installation must be in accordance with the current BS 7671 (I.E.T. wiring regulations) and part P of the building and / or local regulations. The heater provides 5510W at 230V ac and 6000W at 240V and is designed for a single phase 230-240V 50Hz AC 30A electrical supply.

The unit must be permanently connected to the electrical supply, direct from the consumer unit via an electrical isolation switch with a minimum contact gap of 3 mm in both poles. The switch must be readily accessible and clearly identified and sited adjacent to the unit. The wiring must be connected to the switch without the use of a plug or socket outlet.

The unit comes supplied with a short length of 3 core cable already attached. This MUST be wired directly to an adjacent local isolator switch.
