

BRIGHT CHROME

BRUSHED NICKEL

Product Introduction

Reditap is a 3-in-1 kitchen sink solution that provides near boiling water from one side of the tap for drinks and food preparation, and a hot and cold mixer function on the other side. Boiling water is supplied from a compact dedicated 2 litre tank under the sink whilst the mixer functions is connected to conventional hot and cold domestic water supplies

Key Features

- Available in high quality bright chrome or brushed nickel tap finishes to suit sink finish and décor
- The Reditap has a push down safety release mechanism to prevent accidental dispensing of boiling water
- The 2 litre boiling tank has a greater capacity than a domestic kettle and is compact to minimise loss of cupboard space
- Simple, speedy connection - drain valve assembly and all hose fittings supplied
- Easy tank access for inspection and ease of descaling, where required
- Boiling calibration with thermal overheat protection
- Heating element 'ON' indication
- High density CFC free polystyrene insulation to minimise heat loss
- Fitted with cable and UK plug
- 2 year UK manufacturer guarantee
